HOW TO READ THIS REPORT

Every number here is a **result** — a measure of what happened on the floor, graded by the PBiR engine across every possession. Nothing here is a pick, a prediction, or advice. Higher PBiR score = bigger measured impact. You decide what to do with it.

PBIR SCORE

0–100 read of measured impact — the engine's single-number summary.

POSSESSION EDGE

Which side controlled possessions and efficiency.

MINUTE INDEX

Where the runs and swings happened across the game.

PLAYER IMPACT

Who actually moved the game — rated by PBiR, not by name.

The exact scoring method behind these numbers is proprietary and never shown. You see results — counts, scores, rankings — only.

KEY TAKEAWAYS

- ▶ Next Opponent's measured impact concentrates in two players (A & B) — both 80+ PBiR.
- ▶ They build their biggest Minute Index swings in the second half.
- ▶ Possession edge has favored them in 4 of their last 5 sampled games.
- ▶ Role Player D has trended down recently (PBiR 69).
- ▶ Scouting is informational only — measured patterns, never a prediction.
